

EXPERIENCE EASIER I.T.

Sterling is Awarded Three NASA SEWP V Contracts

\$20B contract provides federal agencies with state-of-the-art technology and services

Dakota Dunes, SD (March 26th, 2015) - STERLING COMPUTERS CORPORATION, a leading provider of I.T. products and services, announced today it was chosen by the National Aeronautics and Space Administration (NASA) as one of the prime recipients of the fifth iteration of the Solutions Enterprise Wide Procurement (SEWP) Government-Wide Agency Contract (GWAC).

Sterling is one of only a select few companies to be named to three of the four product categories, including Computer Based Systems, Server Support Devices/Multi-Function Devices, and Networking/Security/Video and Conference Tools. The company is also able to provide customers with proprietary cybersecurity products through the contract, powered by Sterling's SmartXD technology.

This ten year contract has a ceiling value of \$20 billion, and is open to all NASA centers, federal agencies and other government contractors for the procurement of state-of-the-art computer technologies, high-end scientific and engineering processing capabilities, computer peripherals and networking equipment. SEWP V will create a government-wide capability to gain access to state-of-the-art technology and services, which will be deployed globally.

Sterling is uniquely qualified for this contract, in particular, based on its extensive past performance delivering customized solutions to the federal government. The company is currently a prime contractor on several similar federal contracts, giving them an in-depth understanding of the unique requirements of the federal government. The company also has a national sales team with extensive knowledge of the missions and objectives of the federal agencies utilizing this contract.

"Sterling has invested heavily in growing our technical capabilities and breadth of product offerings. Being awarded three contracts is a testament to the capabilities of our staff and diversity of our suppliers," said Brad Moore, President of Sterling. "This contract enables us to continue to provide great value to our customers by delivering the essential I.T. products and services needed to meet government mission objectives for the next decade."

Sterling owns the web domain www.sewp.com which will be deployed to serve as a market-leading resource for agencies utilizing the SEWP contract. Additionally, a dedicated team is available to assist with any Sterling or SEWP questions. Questions can be directed to info@sewp.com or sewp@sterlingcomputers.com.
